INSTITUTIONAL POLICY FOR “GREEN CAMPUS INITIATIVES”

(With effect from September 1st 2015)

CONCEPT:

A Green Campus is a place where environmental friendly practices and education combine to promote sustainable and eco-friendly practices in the campus. The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of the mankind.

OBJECTIVES OF THE GO GREEN POLICY:

The first step of the Go Green Program involves establishing a POLICYDOCUMENT spelling out the strategies, plans and other allied tasks to make this Program functional officially. We believe that greening the campus is all about sweeping away wasteful inefficiencies and using conventional sources of energies for its daily power needs, correct disposal handling, purchase of environment friendly supplies and effective recycling program. The administration of the Institute believes that everyone has to work out the time bound strategies to implement green campus initiatives. These strategies need to be incorporated into the institutional planning and budgeting processes with the aim of developing a clean and green campus. The Green Campus Initiatives will enable the institution to develop the campus as a living laboratory for innovation.

MAJOR GREEN CAMPUS INITIATIVES:

1. Green landscaping with trees and plants
2. Restricted entry of automobiles
3. Ban of usage of plastic
4. Pedestrian friendly pathways
5. Tree plantation to be done every year through NSS.
6. Celebration of world environmental day every year to create Go Green awareness
7. Tree adoption programs through NSS
8. Waste water recycling – Establishing Sewage Treatment Plant (STP) in the campus
9. Establishing Rain water harvesting system in the campus
10. Borewell /open well recharge system
11. Solid waste, e-waste and wet waste management/recycling system
12. Installation of solar power station in the campus
13. Use of LEDs for energy conservation
14. Cleanliness drive through NSS
15. Digital library/ e-learning center
16. Automation software for campus maintenance to make paperless administration
